

Set precise torque tolerances either by Nm or %.

Capture installed torque of static digital, continuous drive, click & slipping tools.

Capture first peak of click wrenches.

# ST\*\*\* + SCBP/SCBS

## Smart torque testers

### Basic specification

- Accuracy  $\pm 0.5\%$  actual reading.
- 1-2000Nm range across ST\*\*\* series.
- Full colour OLED screen.
- Measurement modes of operation: **Track** current torque, set torque **Presets**, capture **Peak**, **Click** & **Installed** torque.
- Smart Control Box (SCB) compatible with all ST & vice versa.
- **SCBP**: 1 preset with dynamic peak and all standard modes,
- **SCBS**: 99 presets with SCBP features and click-torque mode.
- Compatible with Torque Calibration Rig (TCR2000).
- Durable locking connector.
- Supplied with serial output on request.
- Wireless communications available.

## TRACEABILITY

Fully traceable calibration certification

Each ST has a unique identifier

## COMPLIANCE

Check and calibrate mechanical and electronic products

## PRODUCTIVITY

Modular design leads to reduction in costs and product downtime

*Torque it right first time, every time!*
